Recommendations by Intended Action Chart

Under Data Mining & Extracts > Fire Protection Engineering, Boiler & Machinery Engineering or Infrared Thermography, there is new Data Extract entitled, **By Intended Action – Chart to Report**. These new drill-down charts function the same as the **By Impact** or **By Status** and are available for both Active and All Recommendation sections. The new charts are also available for Fire, Boiler & Machinery and Infrared recommendations.

For any questions or if you experience any difficulties, please send a detailed email to ITApplications@tuvsud.com.
