

## 2020 July - GRC Connect user interface redesigned

Much of the GRC Connect interface has been redesigned. For more information on the redesign, see the **Knowledge Base**. The link to the Knowledge Base can be found in the upper right-hand corner of the screen after logging in.

The Knowledge Base is not the only link that has moved or changed.

If you are having trouble finding other links, here is a table which shows how to find other pages that have moved:

Old location	New location
Facility Navigation	The Services page has a Tile for each service
Charts & Reports...	All charts, reports, data mining, and <b>extract</b> links can now be found on the Reports page which is reached by the Reports menu item
Data Mining & Extracts ...	
User Tools   myBatch Reports Tool	Tools   Batch Reports
User Tools   myBatch Reports!	After you schedule Batch Reports, the output is viewed in the Batch Reports section of the Reports page
User Tools   myPreferences	Tools   My Preferences
User Tools   User Account Grid	Tools   User Accounts
User Tools   User Activity Log	Tools   User Activity

Map View ...	All other map views can be reached by clicking the Map View button on the associated grid found on the Reports Page
Project Management	Tools   Project Management
Facility Level Output Reports	Combined into a single “Facility Level Reports” menu item on the Location Details page.
Facility Level Data Extracts	

The screenshot displays the Global Risk Consultants web application. The top navigation bar includes the TUV SUD logo, the company name 'Global Risk Consultants', and user details for 'ABC Company'. Utility links such as 'Knowledge Base', 'Contact Us', 'Logout', and 'Mark Rauch (TUV)' are present. A sidebar on the left provides quick access to 'Services', 'Dashboard', 'Reports', 'Favorites', 'Document Library', and 'Tools'. The central workspace is organized into a grid of service tiles. Five primary service tiles (B&M, Fire, Infrared, Natural Hazards, Jurisdictional) each offer links to 'Reports', 'Document Library', and 'Location Listing'. Two additional tiles, 'Diversified Services' and 'Process Safety', are shown below with 'Learn More...' links. A footer section contains a 'Display Inactive Services?' toggle (currently set to 'Yes') and the version identifier 'Rev (2543)'.
