

**Global Risk
Consultants®**

Jurisdictional Boiler & Pressure Vessel Inspections

Dedication in providing services to
address today's challenges

At ARISE, our goal is to deliver the best quality and the highest value of service—on time. Whether for jurisdictional boiler and pressure vessel inspections, shop inspections, risk analysis or training, we customize our high-quality services to your specific needs. We're always committed to delivering the most thorough, responsive and personal service available.

ARISE accreditations include ASME, NB, IBR, MSHA and DOT. Our teams of licensed authorized inspectors only operate with the highest degree of professionalism. Furthermore, we customize our jurisdictional and shop inspection services, risk analysis, reporting and training to your specific requirements.

ARISE Incorporated (ARISE), a subsidiary of TÜV SÜD Global Risk Consultants (GRC), is accredited by the American Society of Mechanical Engineers (ASME) and the National Board of Boiler Pressure Vessel Inspectors to perform third-party inspections of boilers, pressure vessels,

and components.

The ARISE Advantage

ARISE inspectors hold National Board Commissions with special endorsements and multiple state licenses for efficiency in servicing.

Structured and dedicated to servicing the unbundled insurance market, ARISE is committed to proactive involvement in our clients' jurisdictional programs. ARISE is also in accordance with the National Board Inspection Code (NBIC) and jurisdictional requirements.

We are licensed to operate in the United States, Canada and, Puerto Rico through a network of preferred partners. ARISE inspectors hold National Board Commissions with special endorsements and multiple state licenses for efficiencies in servicing.

- Government-mandated jurisdictional inspections and

issuance of required certifications

- Inspections of new fabrication of boilers, pressure vessels, and components for compliance to ASME and Pressure Equipment Directive (PED) standards
- Training programs that focus on ASME and National Board quality control programs and boiler maintenance and operations
- Inspections of repairs and alterations to boilers and pressure vessels
- Code requirement consulting for quality control, welding, nondestructive examination, and metallurgy
- Assistance in developing regulatory-compliant Corporate Standards Inspections to other standards, such as mine safety and health requirements, and D.O.T

About TÜV SÜD

TÜV SÜD is a premium quality, safety and sustainability solutions provider that specialises in assessment, testing, inspection, auditing, certification, training and knowledge services. Represented in over 1,000 locations worldwide, we hold accreditations in Europe, the Americas, the Middle East, Africa and Asia. By delivering objective solutions to our customers, we add tangible value to businesses, consumers and the environment.
