Customized Training Services

Dedication in providing services to
address today's challenges

What is the value of effective training when the return on investment is difficult to quantify?

According to the Federal Emergency Management Agency (FEMA), more than 40% of businesses never reopen after a disaster, and for those that do, only 29% were still operating after two years. Fortunately, the devastating effects of these disasters can be mitigated or avoided altogether.

TÜV SÜD GRC's training services will help you to:

- Understand the hazards that threaten your business
- Enhance your ability to reduce or eliminate risks associated with identified threats
- Develop practices to minimize exposure to new threats regulatory activity

Our training services address fire, explosion, natural hazards and equipment-related hazards, and are delivered online or presented on-site by our experienced training staff.

How can TÜV SÜD GRC's Training Services help?

Consider the following examples of how TÜV SÜD GRC training solutions respond to known risk management challenges:

Problem: 85% of sprinkler system failures are linked to human element deficiencies

Solution: TÜV SÜD GRC training programs designed to enhance your ability to ensure water-based fire protection systems will work when needed

Problem: 60% of commercial properties are insured for less than 75% of replacement cost

Solution: TÜV SÜD GRC training programs focused on understanding and reporting accurate property values

Problem: More than 2,600 hot work structure fires occur in commercial properties each year

Solution: TÜV SÜD GRC training programs addressing hot

work hazards and effective use of our hot work permit program

Problem: Since 1980, tropical cyclones (hurricanes) have caused \$566 billion in damage

Solution: TÜV SÜD GRC training programs targeting natural hazards and strategies you can employ to mitigate their devastating effects
