## Business Continuity Planning

Dedication in providing services to  
address today's challenges

You know and trust TÜV SÜD GRC for property loss control services. Now, let us help you with your Business Continuity Planning needs.

Identifying business interruption risk, quantifying the potential impact to your company, developing mitigation strategies, and pre-planning for a disaster are the keys to survival. These tasks are generally referred to as Business Impact Analysis (BIA) and Business Continuity Planning (BCP).

In an age of lean manufacturing, outsourcing, and financial uncertainty, risk managers are faced with the daunting task of keeping abreast of their company's Interdependent/Contingent Business Interruption Risk (IBI/ICI). More so, the need is now greater than ever when you consider the following factors:

- Regulations and standards such as ISO 22301, ISO 31000, NFPA 1600, and Sarbanes - Oxley hold officers

accountable

- Greater sensitivity to interruption of revenue stream from natural and man-made disasters
- Increase in disasters (man-made and natural with an extensive history of failures)
- Increased insurer focus on BCP/supply chain loss potential

### 6 Phases of Business Continuity Planning

- Define the scope and commit resources.
- Conduct Business Impact Analysis (BIA)
- Gather existing plans and combine with insights for the basic strategy outline
- Detailed strategy and BCP development
- Conduct BCP testing and revise as necessary
- Plan implementation and maintenance

### Why choose TÜV SÜD GRC as your BCP Development Partner?

Our BCP experts will use their knowledge of your company,

industry, equipment, production bottlenecks, and exposures as the key components of the BCP process.

### **TÜV SÜD GRC offers our clients:**

#### **■ Manufacturing Expertise**

Many BCP consultants focus on finance and information technology while leaving production and supply chain vulnerable. We know industry and processes, and we leverage that knowledge for your benefit.

#### **■ Customer Insight**

We know our clients because we go to your sites.

#### **■ Risk Management Expertise**

Business Interruption, Interdependency, Contingent BI; we live these enterprise risk management issues every day.

#### **■ Independence**

You own the information, not a third party or insurer.
