# Global Risk Consultants®

GRC Connect

Map View

The **Map View** tool allows the user to view the data in a graphical manner. The mapping is available for a number of grids, and you can use the fly-out menu to review what is available by each service.

By first clicking on Map View from the Main Menu, choosing a Service and then selecting a specific grid, the application will open that grid where you can then click on the Show Map button.

The mapping feature graphically depicts what is contained within your grid in accordance with any applied filters, in addition to having Metric Pin Filter selections accessible from the Mapping page.

The **Show** Map icon can be found at the top left portion of the applicable grid web pages. Once on the map page, you can click the **Show Grid**, which will return you to the grid where you can apply or reset any filters or exit the grid to return to the Main Menu.
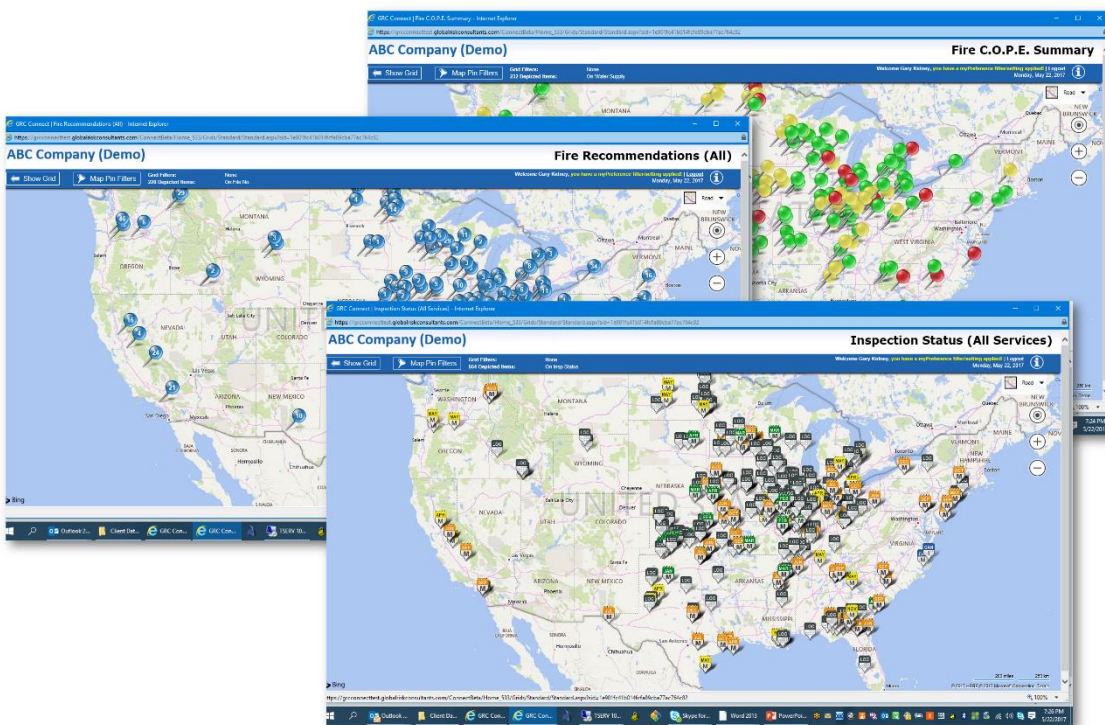

Depending upon the type of data in the grid will depend upon which columns the data can be depicted by in the map view.

For any column that the mapping feature can depict, you will see a new selection at the bottom of the Picklist menu, **Depict Map By**.

A TÜV SÜD Company

With the exception of the Inspection Status grid, each map with contain a simple round pin shape. The map will display color-coding for depictable fields, if applicable.

If color-coding for a particular grid or column is not applicable, the pin will display with the color blue. Some pins contain a numeric counts. In this case you will see the number in the center of the blue pins.

Inspection Status

The data shown in the **Inspection Status** grid includes a pin for ALL inspection records, in addition to any locations where there is no inspection due as part of the current program. This grid displays a calendar style pin including color-coding to easily identify the current status of an inspection, in addition to a Service identifier in the center of the calendar pin.

The color-codIng for the Inspection Status is as follows:

Green identifies Completed status inspections.
Yellow identifies Pending and scheduled, with the first three digits of the Date Scheduled month value.
Orange identifies Pending, not yet scheduled, but contains the first three digits of the estimated targeted month.
Red identifies an inspection with no scheduling dates or an estimated target month.
Blue identifies a Cancelled inspection.
Black will contain LOC in the top of the pin to indicate that no inspection is currently due at that facility.

Each type of inspection will contain a letter abbreviation in the center of the pin to easily identify which Service inspection is being provided.

Fire = Displays an **F** in center of pin if it is a Fire Protection Engineering inspection.

B&M = Displays a **B** in center of pin if it is a Boiler & Machinery Engineering inspection.

Infrared = Displays an **I** in center of pin if it is an Infrared Survey inspection.

Natural Hazards = Displays an **N** in center of pin if it is a Natural Hazards inspection.

Diversified Services = Displays a **D** in center of pin if it is a Diversified Services inspection.

Multiple = Display an **M** in center of pin, if location has multiple inspections for this location.

**CAN** = The blue pin with **CAN** at the top identifies a **Cancelled** inspection.

LOC = The blue pin with LOC at the top identifies no active inspection for that facility.
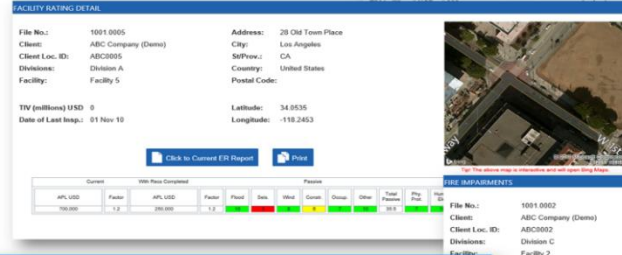

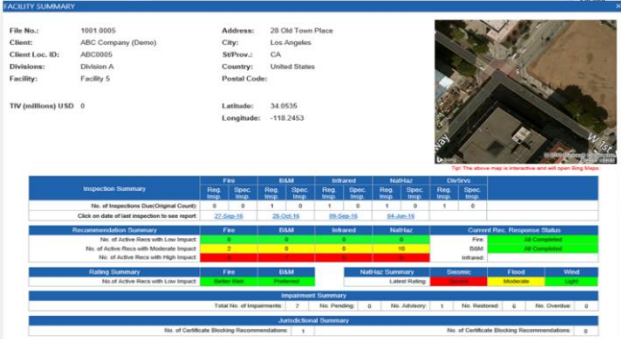

An additional feature introduced with the mapping is the **Form View** for each of the mapping grids. The first column of each grid, you will find an icon of an hourglass. Clicking the hourglass icon will open the form view for any record displaying all details for that record. You can also open the form view by clicking on any pin in the map view.

From the Form View popup you can access the latest engineer report, print the relevant output report or simply print a snapshot of all that's contained on the Form View by clicking the print icon.

The form contains a Bing image of the facility. Clicking on the image will open the Bing website directly to that particular facility. This will open in a new window where you can close at any time, returning you back to GRC Connect.

Map View Grid Listing

All Services

Inspection Status - a view of entire inspection program in one grid and map view, including active locations with no current inspection.

Fire Protection Engineering

Facility Rating Summary - graphical view of Overall Rating in summary view of rating data.

Facility Rating Detail - graphical view of all Rating details.

All Recommendations - graphical view by facility, providing counts within pin image.

Active Recommendations - graphical view by facility, providing counts within pin image.

All Rec Response Follow-Up - graphical view of the current status of the Auto-Rec Response activity for all statuses.

Pending Rec Response Follow-Up - graphical view of the Pending status of the Auto-Rec Response activity.

Loss Estimates - provides ability to choose or filter on selected loss estimate ranges to then see in the graphical map.

C.O.P.E. Summary - provides ability to choose from various C.O.P.E. fields to then depict in graphical map.

Human Element Summary - provides ability to choose from various Human Element fields to then depict in graphical map.

Impairments - new faciliity-level view of the history of impairments.

Inspection Status - Just the current Fire inspection program.

Boiler & Machinery Engineering

Facility Rating Summary - graphical view of Overall Rating in summary of rating fields.

Facility Rating Detail - graphical view of all Rating details.

All Recommendations - graphical view by facility, providing counts within pin image.

Active Recommendations - graphical view by facility, providing counts within pin image.

All Rec Response Follow-Up - graphical view of the current status of the Auto-Rec Response activity for all statuses.

Pending Rec Response Follow-Up - graphical view of the Pending status of the Auto-Rec Response activity.

Loss Estimates - provides ability to choose or filter on selected loss estimate ranges to then see in the graphical map.

Facility Data Summary - provides ability to choose from various Facility Data fields to then depict in graphical map.

Mechanical Maintenance Summary - provides ability to choose from various Mech./Maint. fields to then depict in graphical map.

Electrical Maintenance Summary - provides ability to choose from various Elect.Maint. fields to then depict in graphical map.

Human Element Summary - provides ability to choose from various Human Element fields to then depict in graphical map.

Inspection Status - Just the current B&M inspection program.

Infrared Thermography

All Recommendations - graphical view by facility, providing counts within pin image.

Active Recommendations - graphical view by facility, providing counts within pin image.

All Rec Response Follow-Up - graphical view of the current status of the Auto-Rec Response activity for all statuses.

Pending Rec Response Follow-Up - graphical view of the Pending status of the Auto-Rec Response activity.

Inspection Status - Just the current Infrared inspection program.

Natural Hazards

All Recommendations - graphical view by facility, providing counts within pin image.

Active Recommendations - graphical view by facility, providing counts within pin image.

All Rec Response Follow-Up - graphical view of the current status of the Auto-Rec Response activity for all statuses.

Pending Rec Response Follow-Up - graphical view of the Pending status of the Auto-Rec Response activity.

Inspection Status - Just the current Natural Hazards inspection program.

Diversified Services

Inspection Status - Just the current Diversified Services inspection program.
